

# Energy Rescuers at Antingham and Southrepps Community Primary School

#### Why save?

To save the planet and make us all more aware of the affects of wasting energy.

What did we do?

We sang the recycling song to parents

in assembly, hoping that this will

reinforce the pupils' actions at home

and at home, whilst at the same time

improving links with the wider school

community.

### The long-term impact?

We hope that pupils will continue in sharing how they are reducing energy at school and at home, and pass this onto new pupils coming into the school. This will hopefully ensure sustainable change across the whole school.

#### How to evaluate?

Pupils were noticing ways of saving energy in class. Pupils continue to tell me daily how they save energy at home. Pupils are still singing the song!

## Learning and 'wow' moments?

Miriam said 'if the world gets hot the polar bears have nowhere to live.'
Beth said 'the world will be wrapped in a blanket.'
